

# Praveen Yadav

Senior Full-Stack Software Engineer

+91-7888859348    praveen098.py@gmail.com    linkedin.com/in/praveen-yadav

## Professional Summary

Senior Software Engineer with 4+ years of experience in full-stack development, specializing in JavaScript, Node.js, TypeScript, and AWS. Experienced in designing scalable microservices and integrating cloud solutions (Lambda, API Gateway, S3, PostgreSQL, Cognito). Skilled in applying SOLID principles, and secure coding practices. Proven ability to deliver high-quality software, lead architectural discussions, and contribute to enterprise-grade application development.

## Technical Skills

- **Languages:** JavaScript, TypeScript, SQL
- **Backend:** Node.js, Nest.js, Express.js, Serverless (AWS Lambda)
- **Frontend:** React.js, SvelteKit, HTML/CSS
- **Databases:** PostgreSQL, MySQL, Redis
- **DevOps:** AWS (API Gateway, S3, RDS, Cognito, CloudWatch), Docker, CI/CD
- **Testing:** Jest, Vitest, Unit/Integration Testing
- **Architecture:** Microservices, Event-Driven Systems
- **Best Practices:** SOLID principles, Secure Coding, Agile
- **Other:** Web3, Git, GitHub, Bitbucket, Kafka, RabbitMQ, WebSockets, RCA, Documentation

## Professional Experience

### VT Netzwelt

Senior Software Engineer

Nov 2024 – Present

Chandigarh, India

- Developed features for a consumer portal using **Svelte** within a microservices-based architecture
- Implemented comprehensive unit testing for server functions using Vitest testing framework.
- Delivered features aligned with NFR goals for high availability, low latency, and secure data handling
- Implemented unit and integration testing using **Vitest**, improving code reliability and reducing production issues

### Antier Solutions

Software Developer

Feb 2021 – Nov 2024

Mohali, India

- Engineered event-driven microservices using **Node.js, Nest.js, PostgreSQL, Kafka** for fintech and blockchain platforms
- Created architectural documents and contributed to system design discussions for scalable backend services
- Collaborated with cross-functional teams to convert business requirements into well-defined technical features
- Investigated and resolved high-priority production issues through RCA and long-term solutions
- Explored and delivered POCs to evaluate technology feasibility and align with strategic initiatives

## Key Projects

### VT Netzwelt

Senior Software Engineer

Nov 2024 – Present

Chandigarh, India

- Contributed to the development of GfK's **Consumer Portals** using **Svelte** in a microservices-based architecture
- Developed server-side features and utilities with a focus on modularity and maintainability
- Wrote and maintained unit tests using **Vitest**, improving coverage and code reliability
- Participated in Lambda-based service enhancements and integrations with AWS components

### Hydro: Monetization Platform

Lead Developer

Dec 2023 – Nov 2024

[dashboard.hydro.online](https://dashboard.hydro.online)

- Architected event-driven microservices using **Nest.js, PostgreSQL, and Kafka**
- Designed scalable database structures to handle high-volume event processing
- Led a cross-functional team to build real-time analytics with sub-200ms response times
- Performed troubleshooting and debugging to resolve production issues efficiently
- Mentored junior developers and conducted knowledge-sharing sessions within the team

## Education

### R.I.E.I.T

B.E. in Electronics & Communication

Aug 2012 – Jul 2016

Punjab, India
